

## DROUGHT CONDITIONS

For the first time since late 2010, less than half the state is under drought conditions. We saw improvements in south Texas and the southern High Plains over the past week, but drought worsened in north Texas. One patch of exceptional drought includes Dallas, Fort Worth, Weatherford, and Mineral Wells, and another patch includes the Wichita Falls area.

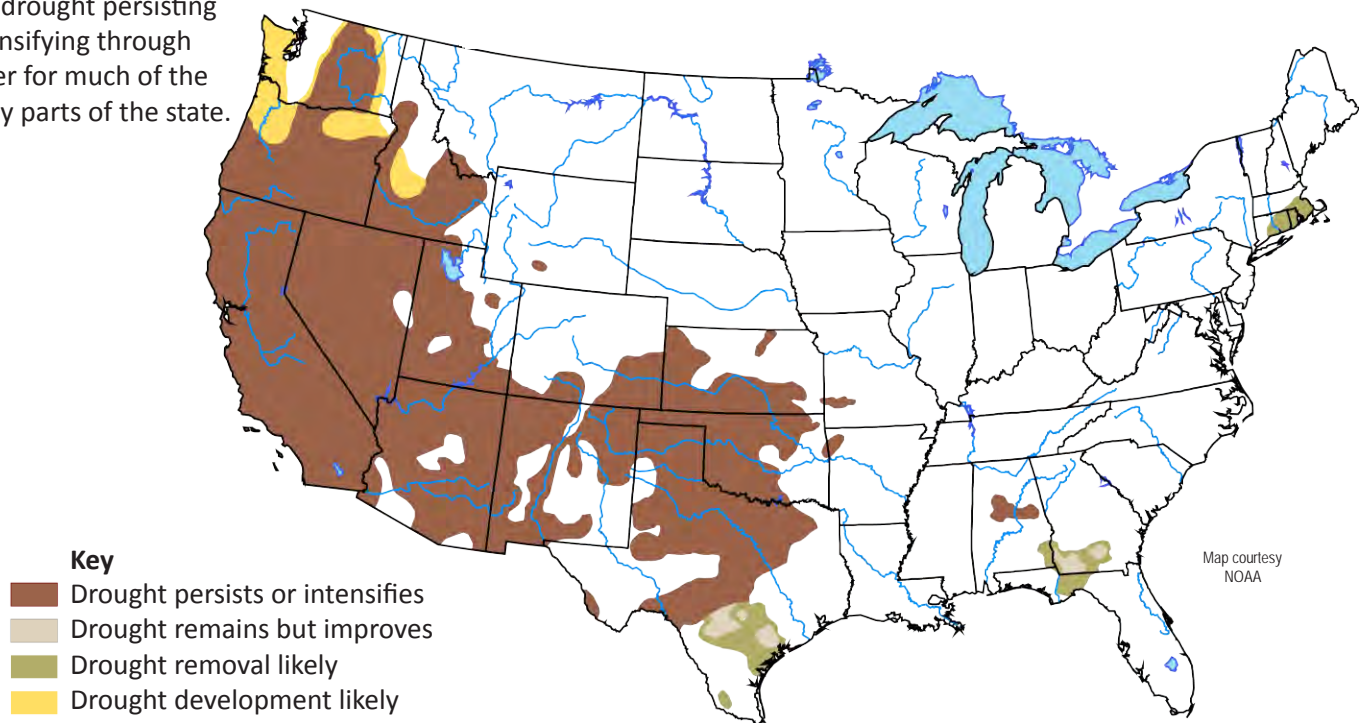

### Drought statistics

- 49% of state currently in moderate to exceptional drought
- 52% a week ago
- 60% three months ago
- 71% a year ago

## U.S. MONTHLY DROUGHT OUTLOOK

The U.S. Monthly Drought Outlook shows drought persisting or intensifying through October for much of the drouthy parts of the state.
