

WATER CONDITIONS

We're starting the New Year off right with the fifth week in a row of no drought in Texas (according to the U.S. Drought Monitor) and the tenth week in a row of increasing statewide reservoir storage. Four regions of the state (Trans Pecos, Edwards Plateau, South, and Lower Valley) continue to have storage levels below normal for this time of year.

STATEWIDE RESERVOIR STORAGE LEVELS

Many of our reservoirs in the eastern part of the state are full or nearly full; however, many reservoirs in the western and southern parts of the state are below normal for this time of year.
