

# Water Weekly

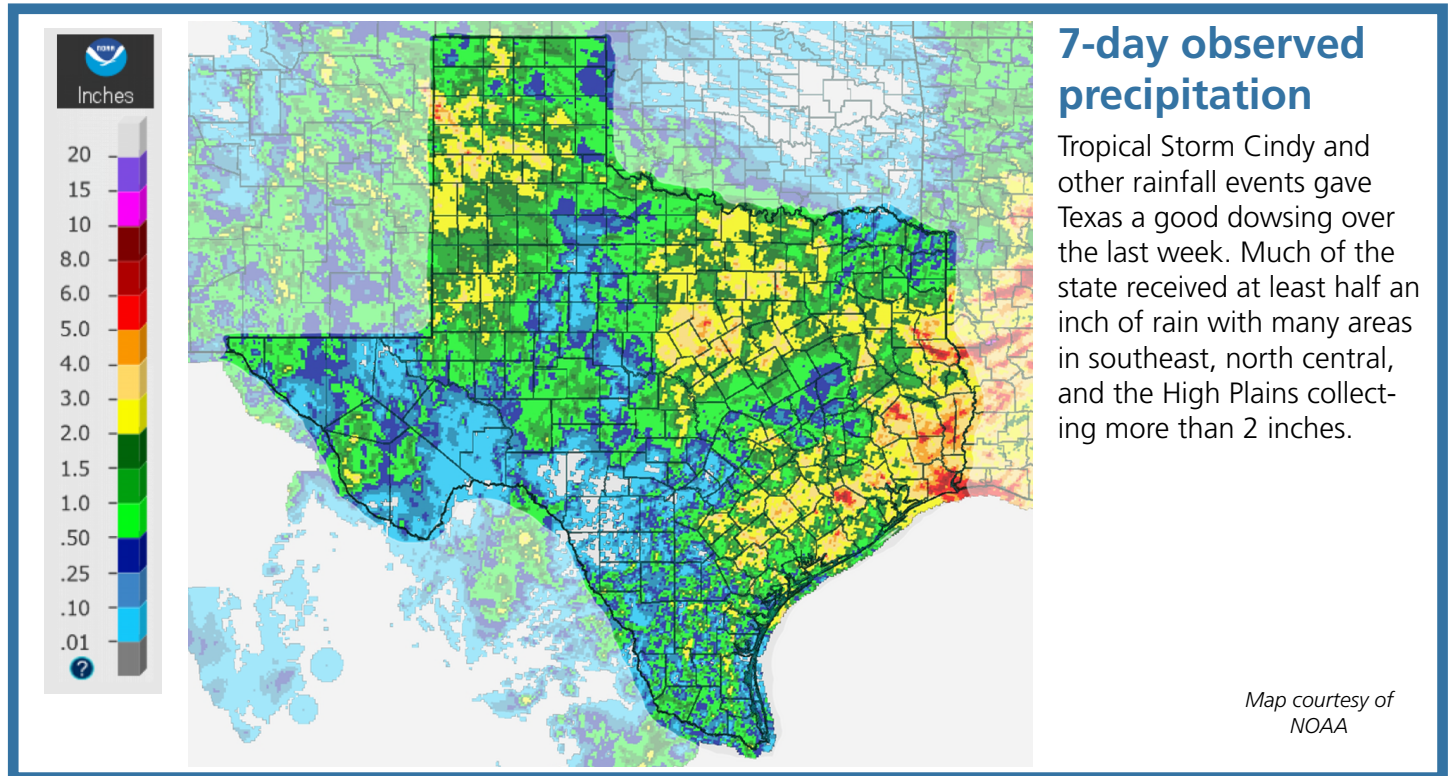

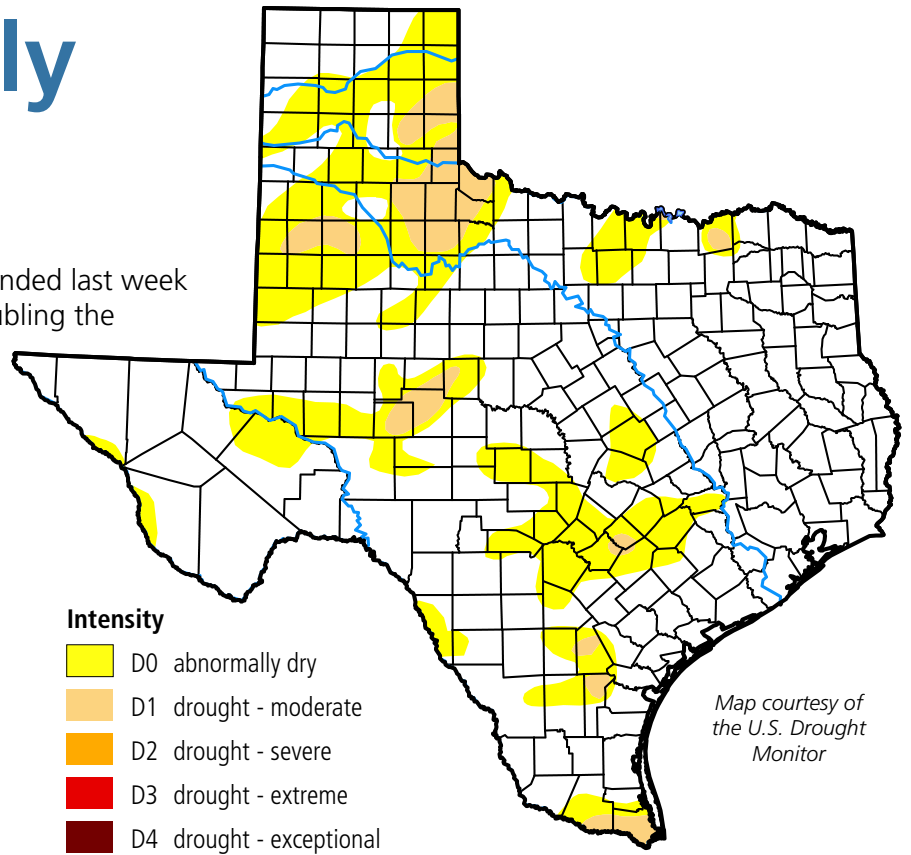

For the week of 06/26/17

## Water conditions

Drought and abnormally dry conditions expanded last week in the High Plains and San Angelo areas, doubling the amount of Texas in drought to 5 percent. Rains over the past weekend, especially in West Texas, will probably knock drought down a notch this week.

## Drought conditions

- ◆ 5% now
- ◆ 2% a week ago
- ◆ 9% three months ago
- ◆ 0% a year ago

## 7-day observed precipitation

Tropical Storm Cindy and other rainfall events gave Texas a good dowsing over the last week. Much of the state received at least half an inch of rain with many areas in southeast, north central, and the High Plains collecting more than 2 inches.
